

FOR COMPANIES WITH OLD SOFTWARE, OR NO TECH TEAM

Tell us the problem. We solve it at our own risk.

What is the problem costing you the most time or money? And what does it cost you, every month, to leave it unsolved?

We build a solution in **4 weeks**. You pay **only if it hits the result** we agree on, in writing, before we start. No deposit, no binding contract.

PROBLEMS WE HEAR EVERY WEEK

01

Quotes, offers and paperwork done by hand. Hours, every day.

02

Calls, emails and orders that slip through the cracks.

03

A 15-year-old system nobody really knows how to use anymore.

HOW IT WORKS

- 1 A **20-minute call**. Together we pick **one** concrete problem to solve.
- 2 We put in writing what "it works" means: 1-3 **measurable criteria** (e.g. from 2 hours to 10 minutes per quote).
- 3 We build it in **4 weeks**, at our own risk. You give us a few hours and a sample of your data.
- 4 Acceptance test on the agreed criteria. If it hits them, **you pay**. If not, **you pay nothing** and we part as friends.

WHY WE CAN AFFORD THIS

With **AI agents** we deliver in weeks what used to take months: if something doesn't work, we find out fast, and you don't pay for it. It is not a trick, it is the reason we exist.

The goal is **not to cut people**. It is to take the repetitive work off you and your team, so they do what matters.

What we build is **yours** and documented. For **30 days** after delivery we stay with you, step by step.

WHAT YOU DON'T RISK

- **No deposit**, no binding contract.
- **Zero financial risk**: you don't pay if we don't reach the agreed result.
- Your **data stays yours**. DPA signed, never used for anything else.
- Only **1 project a month** on these terms: a dedicated team for 4 weeks.

REAL RESULTS, REAL COMPANIES

Numeraria

ACCOUNTING & PAYROLL FIRM

Half a month of management time handed back, end-to-end automation.

Navily

BOATING COMMUNITY

70%+ less operational time, with precision kept.

ILTEC

OFFICE TECHNOLOGY · BIELLA

Site **SEO and GEO optimized** in 3 weeks, found on ChatGPT, Perplexity and Google.

40+ projects delivered · 11 countries · team of 11 people · based in Biella · first working version in **4 weeks** · 30 days of hypercare included

Let's talk.

A 20-minute call, no obligation. We figure out the problem and whether we can really solve it. You decide after.
